

OPIN SYSTEMS

Disaster Recovery

Service Benefits

As organisations depend more and more on their technology and have gained hugely in terms of productivity and efficiency through its use, the impact of a temporary or permanent loss of that technology has increased in proportion to the dependency.

Disaster Recovery / Business Continuity planning are Risk mitigation activities commonly developed to provide contingency against Fire or Power failure. Very often planning is overlooked or inadequate.

Disaster Recovery / Business Continuity planning are organic process which can take time and energy to implement properly.

Irrespective of the state of an Organisation's plans, Opin systems can bring expertise and focus which can allow organisations to continue with their core business by allowing us to use our experience to develop robust, organic and sensible plans.

Experience

Opin systems are experienced in providing advice and guidance to organisations who need help to focus on developing their plans or who might benefit from a review or update of their existing plans.

Services

Opin systems can:

- Provide Leadership in the development of a Business Continuity plan
- Audit Organisational readiness (either technical or non-technical)
- Provide Project Management for the development of Disaster Recovery plans
- Provide Project Management for Recovery Tests
- Provide advice and guidance on partnering hardware providers and identification of DR sites.
- Provide architectural advice in the area of data/storage and service availability and network availability

Our services are bespoke consultancy engagements and are priced dependent on requirements.
